

Heat detector

Part-No. XH100-DE

Approval: requested

The X Series fire alarms are suitable for use in both residential and vacation homes, as well as RVs and boats. A built-in, sealed battery allows for a service life of 10 years.

The detectors are equipped with highly visible status indicators for battery (green) and fault (yellow) and three extra large alarm indicators (red).

All fire alarms in the Honeywell X Series can be wirelessly connected to an optional radio module. In this configuration, all connected devices emit an audible alarm when one of the X Series detectors triggers an alarm. This is particularly useful for large buildings or multi-family houses.

Features:

- Sealed battery for 10 years of operation
- Maintenance-free
- Easiest operation
- Detector test with reduced audible alarm
- Clear status indicators for battery, fault, and alarm
- Temporal alarm or fault suppression
- Easy installation
- Optional connectable wireless module

Operating voltage	3 V Lithium battery, permanently installed
Battery operating time	approx. 10 years
Sound level	85 dB @ 3 m
Ambient temperature	-10 °C ... 55 °C
Type of protection	IP 2XD
Air humidity	< 95 % (non condensing)
Weight	approx. 185 g
Specification	acc. BS 5446-2:2003
Dimensions	Ø: 116 mm H: 42 mm
